

EQUINOX

Gobo Projector XP 80W

User Manual

Order code: EQLED084

WARNING

FOR YOUR OWN SAFETY, PLEASE READ THIS USER MANUAL CAREFULLY BEFORE YOUR INITIAL START-UP!

- Before your initial start-up, please make sure that there is no damage caused during transportation.
- Should there be any damage, consult your dealer and do not use the equipment.
- To maintain the equipment in good working condition and to ensure safe operation, it is necessary for the user to follow the safety instructions and warning notes written in this manual.
- Please note that damages caused by user modifications to this equipment are not subject to warranty.

IMPORTANT:

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorised modification to the equipment.

- Never let the power cable come into contact with other cables. Handle the power cable and all mains voltage connections with particular caution!
- Never remove warning or informative labels from the unit.
- Do not open the equipment and do not modify the unit.
- Do not connect this equipment to a dimmer pack.
- Do not switch the equipment on and off in short intervals, as this will reduce the system's life.
- Only use the equipment indoors.
- Do not expose to flammable sources, liquids or gases.
- Always disconnect the power from the mains when equipment is not in use or before cleaning! Only handle the power-cable by the plug. Never pull out the plug by pulling the power-cable.
- Make sure that the available mains supply voltage is between 100~240V AC, 50/60Hz.
- Make sure that the power cable is never crimped or damaged. Check the equipment and the power cable periodically.
- If the equipment is dropped or damaged, disconnect the mains power supply immediately and have a qualified engineer inspect the equipment before operating again.
- This unit is not intended for fixed installation.
- If the equipment has been exposed to drastic temperature fluctuation (e.g. after transportation), do not connect power or switch it on immediately. The arising condensation might damage the equipment. Leave the equipment switched off until it has reached room temperature.
- If your product fails to function correctly, stop use immediately. Pack the unit securely (preferably in the original packing material), and return it to your Pro Light dealer for service.
- Only use fuses of same type and rating.
- Repairs, servicing and power connection must only be carried out by a qualified technician. THIS UNIT CONTAINS NO USER SERVICEABLE PARTS.
- This lighting fixture is for professional use only - it is not designed for or suitable for household use. The product must be installed by a qualified technician in accordance with local territory regulations. The safety of the installation is the responsibility of the installer. The fixture presents risks of severe injury or death due to fire hazards, electric shock and falls.
- Warning! Risk Group 2 LED product according to EN 62471. Do not view the light output with optical instruments or any device that may concentrate the beam.
- WARRANTY: One year from date of purchase.

OPERATING DETERMINATIONS

If this equipment is operated in any other way, than those described in this manual, the product may suffer damage and the warranty becomes void. Incorrect operation may lead to danger e.g: short-circuit, burns and electric shocks etc.

Do not endanger your own safety and the safety of others!

Incorrect installation or use can cause serious damage to people and/or property.

Please note: These fixtures are intended for stage lighting and entertainment applications only, and are not intended for extended periods of use, including but not limited to house-light, industrial or architectural applications and should only be operated with short duty cycles.

Gobo Projector XP 80W

Powered by a 80W LED, this high-output gobo projector allows you to project a custom message or image. It comes with 11 easily replaceable, rotating gobos.

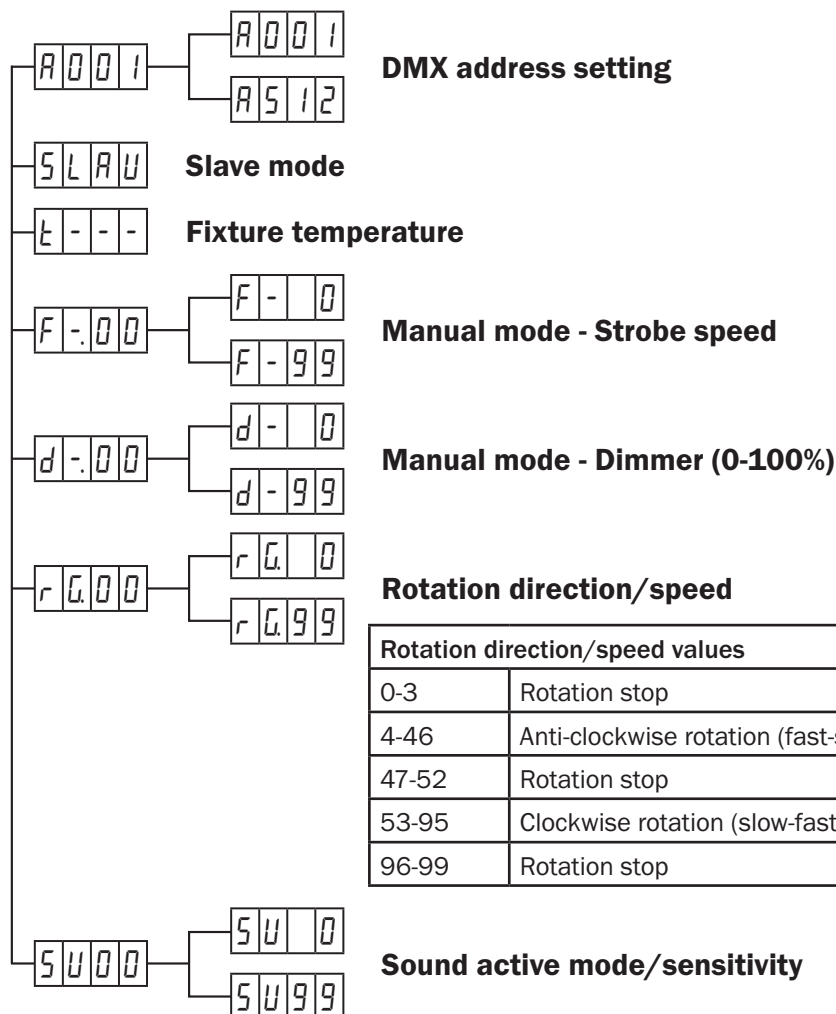

- 1 x 80W white LED
- Beam angle: 23°, 31° and 42° via supplied lenses
- 8000 Lux @ 2m (23°)
- DMX channels: 3
- Auto, sound active and master/slave modes
- 0-100% dimming and variable strobe
- 4 push button menu with LED display
- IEC power input/output
- 3-pin XLR input/output
- Fan cooled
- Supplied with hanging bracket

Specifications	
Power consumption	135W
Power supply	100~240V, 50/60Hz
Fuse	F3A 250V
Dimensions	210 x 265 x 230mm
Weight	3.3kg
Order code	EQLED084

Operating instructions

DMX mode:

Operating in a DMX control mode environment gives the user the greatest flexibility when it comes to customising or creating a show. In this mode you will be able to control each individual trait of the fixture and each fixture independently.

To access the DMX address mode, press the “**MENU**” button on the rear of the unit to show *R001* on the LED display. Now press the “**ENTER**” button and use the “**UP**” and “**DOWN**” buttons to set the required DMX address. Press the “**ENTER**” button to confirm the setting.

To exit out of any of the above options, press the “**MENU**” button.

3 channel mode:

Channel	Value	Function
CH1	000-255	Master dimmer (0-100%)
CH2	000-007	No function
	008-247	Strobe (slow-fast)
	248-255	Sound active strobe
CH3	000-009	Rotation stop
	010-120	Anti-clockwise rotation (fast-slow)
	121-134	Rotation stop
	135-245	Clockwise rotation (slow-fast)
	246-255	Rotation stop

Manual mode:

To access the manual mode, press the “**MENU**” button on the rear of the unit to show *F-00* on the LED display. Now press the “**ENTER**” button and use the “**UP**” and “**DOWN**” buttons to select the strobe speed between *F-0 ~ F-99*.

Press the “**ENTER**” button to confirm the setting. Now press the “**MENU**” button and *d-00* will be displayed. Now press the “**ENTER**” button and use the “**UP**” and “**DOWN**” buttons to select the dimming between *d-0 ~ d-99*. Repeat for *r-0 ~ r-99* (Rotation direction/speed).

To exit out of any of the above options, press the “**MENU**” button.

Sound active mode:

To access the sound active mode, press the “**MENU**” button on the rear of the unit to show *SU00* on the LED display. Now press the “**ENTER**” button and use the “**UP**” and “**DOWN**” buttons to select the strobe speed between *SU0 ~ SU99*.

To exit out of any of the above options, press the “**MENU**” button.

Master/slave mode:

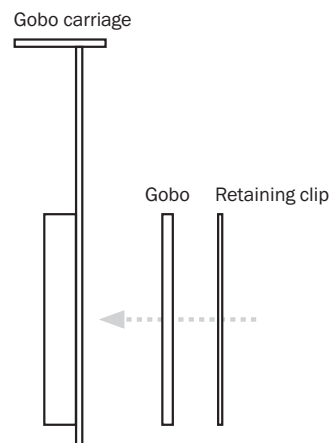

To set the master unit, press the “**MENU**” button on the rear of the master unit to select your desired program (sound active or manual).

To set the other units in slave mode, press the “**MENU**” button on the rear of the unit to show *SLAU* on the LED display and press the “**ENTER**” button to confirm the setting. The units will now run in sequence with the master unit.

To exit out of any of the above options, press the “**MENU**” button.

Gobo replacement:

The Gobo Projector XP is supplied with 11 steel gobo's. To replace the gobo first power off the fixture and leave to cool. Isolate the fixture from the mains voltage supply. On the underside of the unit remove the two thumbscrews and rotate the metal plate 90° clockwise. Once rotated lift the metal plate upwards and towards the left simultaneously. Carefully remove the circlip holding the gobo in place, then remove the gobo and replace with the new gobo. Install the gobo retaining circlip and reinstall the gobo carriage into the fixture. Replace the thumbscrews taking care to tighten them fully. Power on the fixture and adjust focus as required.

Users may change the gobos supplied for a custom design of their own. Custom gobos can be made of metal, or glass. The image size for custom gobos should be no greater than 35mmØ and the overall size of the gobo should be 44mmØ.

Focus:

Manual focus adjustment is done by turning the lens assembly on the front of the fixture. Rotate the lens clockwise or anti-clockwise until the projected image is in focus.

Included gobos:

IR remote functions:

Button functions:

- 01 - Sets the unit into blackout off (LED on)
- 02 - Sets the unit into blackout on (LED off)
- 03 - Sets the unit into strobe mode (on/off)
- 04 - Increases the strobe speed
- 05 - Decreases the strobe speed
- 06 - Sets the unit into dimmer mode
- 07 - Increases the brightness
- 08 - Decreases the brightness
- 09 - Sets the gobo rotation on/off
- 10 - Increases the rotation speed
- 11 - Decreases the rotation speed

Setting the DMX address:

The DMX mode enables the use of a universal DMX controller. Each fixture requires a “start address” from 1- 512. A fixture requiring one or more channels for control begins to read the data on the channel indicated by the start address. For example, a fixture that occupies or uses 7 channels of DMX and was addressed to start on DMX channel 100, would read data from channels: 100,101,102,103,104,105 and 106. Choose a start address so that the channels used do not overlap. E.g. the next unit in the chain starts at 107.

DMX 512:

DMX (Digital Multiplex) is a universal protocol used as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions from the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals located on all DMX fixtures (most controllers only have a data “out” terminal).

DMX linking:

DMX is a language allowing all makes and models of different manufactures to be linked together and operate from a single controller, as long as all fixtures and the controller are DMX compliant. To ensure proper DMX data transmission, when using several DMX fixtures try to use the shortest cable path possible. The order in which fixtures are connected in a DMX line does not influence the DMX addressing. For example; a fixture assigned to a DMX address of 1 may be placed anywhere in a DMX line, at the beginning, at the end, or anywhere in the middle. When a fixture is assigned a DMX address of 1, the DMX controller knows to send DATA assigned to address 1 to that unit, no matter where it is located in the DMX chain.

DATA cable (DMX cable) requirements (for DMX operation):

This fixture can be controlled via DMX-512 protocol. The DMX address is set on the back of the unit. Your unit and your DMX controller require a standard 3-pin XLR connector for data input/output, see image below.

Further DMX cables can be purchased from all good sound and lighting suppliers or Pro Light Concepts dealers.

Please quote:

CABL10 – 2m

CABL11 – 5m

CABL12 – 10m

Also remember that DMX cable must be daisy chained and cannot be split.

Notice:

Be sure to follow the diagrams below when making your own cables. Do not connect the cables shield conductor to the ground lug or allow the shield conductor to come in contact with the XLRs outer casing. Grounding the shield could cause a short circuit and erratic behaviour.

Special note:

Line termination:

When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behaviour.

Using a cable terminator will decrease the possibilities of erratic behaviour.

(3-pin - Order ref: CABL90, 5-pin - Order ref: CABL89)

5-pin XLR DMX connectors:

Some manufactures use 5-pin XLR connectors for data transmission in place of 3-pin. 5-pin XLR fixtures may be implemented in a 3-pin XLR DMX line. When inserting standard 5-pin XLR connectors in to a 3-pin line a cable adaptor must be used. The diagram below details the correct cable conversion.

***Correct Disposal of this Product
(Waste Electrical & Electronic Equipment)***

**(Applicable in the European Union and other European countries
with separate collection systems)**

This marking shown on the product or its literature, indicates that it should not be disposed of with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
