

# Virtual Flame

## LED Virtual Flame

AF-1

## Virtual Flame

AF-2

The virtual Flame is an amazing firelight that has all the feeling of a real flame that attracts your vision. It looks like a raging flame but without fire, totally safe and still cool to the touch. An idealistic alternative for restaurants, nightclubs, theaters, home use or all the places that need a sly, mesmerizing and dazzling atmosphere.

The following points are important for safety as well as for the smooth installation and performance of the unit.

## 1. GETTING STARTED

- Before the initial start-up, please unpack carefully and be sure that no damage has occurred during the transportation.
- The electrical work that is necessary for installation must be done by qualified personnel.
- Before to use note to verify that the unit is installed at the rated voltage, with a ground electrical outlet.
- Be careful that no liquids or other objects can enter the unit. If this ever happens, disconnect the main power immediately. Also keep machine upright.
- Do not touch any wire during the operation, as high voltage might be hazardous causing electric shock.

- In the event of serious operating problems, turn off the unit immediately. Never try to repair the unit yourself. Repairs carried out by non-qualified personnel can lead to serious damage or malfunction. Please contact your dealer about authorized technical assistance.
- Always use genuine spare parts and replace the lamps only with the same type and voltage.
- Always remember to unplug the unit from the power before any service is done.
- The unit should be installed above or at eye level.
- All products are for indoor use only. No set up required, just plug in and turns it on..
- Please recycle the packaging.

## 3. OTHER INFORMATION

The Virtual Flame has been designed and hand cut from the finest silk to interact with the airflow to create a safe and realistic flame effect. However silks will only last for approximately 1 months on continuous use. You may use a sharp pair of scissors to cut carefully the loose silk strands. All Virtual Flames are supplied with 1 silk, including magnets and 9 lamps. The new silks may be purchased from your local Virtual Flame dealer.
