IP6
REMOTE CONTROLLER

The IP6 is a next generation Ethernet L3 based remote controller that can be PoE or DC powered and can live on the building IT network.

6 Rotary controllers can be set to a range and can control any input or output from a dLive system.

12 RGB LED buttons and 6 colour LCD displays provide extensive information and control.

A unique Auto Firmware Matching system keeps the firmware in sync.

The IP range is compatible with the dLive product series.
